## **5 Key Elements of the Policy**

KYC policy of the bank has following four key elements:

- a. Customer Acceptance Policy,
- b. Risk Management
- c. Customer Identification Procedures and
- d. Monitoring of Transactions.

### **5.1 Customer Acceptance Policy (CAP)**

Bank shall develop clear Customer Acceptance Policies and procedures, including a description of the types of customers that are likely to pose a higher than average risk to the bank and including the following aspects of customer relationship in the Bank are:

- i. No account is opened or maintained in anonymous or fictitious / benami name.
- ii. **While opening an account and during the periodic updation**, documents and other information to be collected from different categories of customers are detailed in **ANNEXURE - II of this policy**.
- iii. Bank will not open an account where the bank is unable to apply appropriate customer due diligence measures i.e. bank is unable to verify the identity and / or obtain required documents either due to non-cooperation of the customer or non-reliability of the documents / information furnished by the customer. Bank may also consider closing an existing account under similar circumstances.
- iv. Optional / additional information is obtained with the explicit consent of the customer after the account is opened.
- v. No transaction or account-based relationship is undertaken without following the CDD procedure.
- vi. Circumstances, in which a customer is permitted to act on behalf of another person / entity, shall be clearly spelt out in conformity with the established law and practice of banking.

- vii. Bank shall have suitable systems in place to ensure that the identity of the customer does not match with any person or entity, whose name appears in the sanction lists circulated by the Reserve Bank.
- viii. Bank shall apply the CDD procedure at the UCIC (Unique Customer Identification Code) level. Thus if an existing KYC compliant customer desires to open another account with our bank, there shall be no need for a fresh CDD exercise.
- ix. While opening joint account, CDD Procedure is followed for all the joint account holders.
- x. Through digital signature branch shall verify an equivalent e-document which is obtained from the customer **as explained in 4.13 in this policy**.
- xi. Where Permanent Account Number (PAN) is obtained, the same shall be verified from the verification facility of the issuing authority.

Adoption of customer acceptance policy and its implementation shall not become too restrictive, which result in denial of banking facility to the members of the general public, especially to those, who are financially or socially disadvantaged.

#### **Unique Customer Identification Code (UCIC)**

The increasing complexity and volume of financial transactions necessitate that customers do not have multiple identities within a bank, across the banking system and across the financial system. UCIC helps the bank to identify customers, track the facilities availed, monitor financial transactions in a holistic manner and to have a better approach to risk profiling of customers.

In our Bank, CIF of the customer is the Unique Number for that customer, and it serves the purpose of Unique Customer Identification Code (UCIC).

Before creating a new CIF for any customer for opening any new account, branch should first verify that the same customer has not an existing CIF in the CBS system. If a customer has already been allotted a CIF, the new account(s) of that customer must be opened under the existing CIF only. No additional CIF should be created for him/her. For finding out the existing CIFs of all existing customers, "CIF Search" utility is provided under Intranet (ULC) to the branches, which must be used before opening any new account for any customer.

Utility for knowing the customers already having multiple CIFs in the system is also provided to the branches. Branches should check up the reports provided under this utility on daily basis and undertake the exercise of keeping only one CIF for one customer by linking of additional CIFs created in the system for the same customer to a single CIF and deactivating all other CIFs.

A Unique Customer Identification Code (UCIC) will help the Bank to identify customers, track the facilities availed, monitor financial transactions in a holistic manner and enable the Bank to have a better approach to risk profiling of customers. Branches are required to strictly avoid creating multiple customer IDs while opening new accounts and in case of existing multiple IDs, branches have to carry out the process of de-duplication.

The bank shall not issue UCIC to all walk-in / occasional customers such as buyers of pre-paid instruments / purchasers of third-party products. However, UCIC shall be allotted to such walk-in customers who have frequent transactions in branch.

## **5.2 Risk Management**

The inadequacy or absence of KYC standards can subject the Bank to serious customer and counter party risks especially reputational, operational, legal and concentration risks.

**5.2.1 Reputational Risk:** is defined as “the potential that adverse publicity regarding the Bank’s business practices and associations, whether accurate or not, will cause a loss of confidence in the integrity of the institution”.

**5.2.2 Operational Risk:** can be defined as “the risk of direct or indirect loss resulting from inadequate or failed internal processes, people and systems or from external events.”

**5.2.3 Legal Risk** is “the possibility that lawsuits, adverse judgments or contracts that turn out to be unenforceable can disrupt or adversely affect the operations or condition of the Bank”.

**5.2.4 Concentration Risk** although mostly applicable on the assets side of the balance sheet, may affect the liabilities side as it is also closely associated with funding risk, particularly the risk of early and sudden withdrawal of funds by large depositors, with potentially damaging consequences for the Bank’s liquidity.

It is worth noting that all these risks are interrelated. Any one of them can result in significant financial cost to the Bank as well as the need to divert considerable management time and energy to resolve problems that arise.

Customers frequently have multiple accounts with the Bank, but in offices located at different places. To effectively manage the reputational, operational and legal risk arising from such accounts, Bank shall aggregate and monitor significant balances and activity in these accounts on a fully consolidated basis, whether the accounts are held as on balance sheet, off balance sheet or as assets under management or on a fiduciary basis.

Branches should exercise ongoing due diligence with respect to the business relationship with every customer and closely examine the transactions in order to ensure that they are consistent with their knowledge about the clients, their business and risk profile and where necessary, the source of funds. The Board of Directors of the Bank shall ensure that an effective KYC/AML/CFT programme is put in place by establishing appropriate procedures and ensuring their effective implementation. It shall cover proper management oversight, systems and controls, segregation of duties, training of staff and other related matters.

In addition, the following also to be ensured for effectively implementing the AML/CFT requirements:

- i. Using a risk-based approach to address management and mitigation of various AML/CFT risks.
- ii. Allocation of responsibility for effective implementation of policies and procedures.
- iii. Independent evaluation by the compliance functions of Bank's policies and procedures, including legal and regulatory requirements.
- iv. Concurrent/internal audit/snap audit to verify the compliance with KYC/AML policies and procedures.

#### **D. Freezing and Closure of accounts**

It would always be open to the Bank to close the account of KYC non-compliant customers after issuing due notice to the customer explaining the reasons for taking such a decision. Such decisions need to be taken by the Branch Manager.

While it is absolutely necessary for banks as well as customers to comply with the measures prescribed for KYC/AML purposes, drastic measures like closing of accounts may be taken only after sending out sufficient discernible warning signals to the customers, basing on the level of customer education and public awareness on the subject. In all such cases where the account holders are either not responding over a period of time/not found at the given address, Bank may take such action as deemed necessary to comply with KYC/AML guidelines without denying basic banking facilities.

Before taking the extreme step of closing an account on account of non-compliance with the KYC/AML requirements, as an initial measure, branches are advised to place such accounts under close watch, depriving the non-compliant customers certain additional facilities, till the customer complies with such requirements.

This exercise, however, should not extend beyond a period of three months. If the customer despite such measures, shows unwillingness to comply with KYC/AML/CFT requirements, branches would be free to proceed further and close the accounts after giving due notice to him/her. It is reiterated that basic banking transactions already in force should not be disturbed for meeting KYC review requirements.

In case of non-compliance of KYC requirements by the customers despite repeated reminders by branches, branches should impose "partial freezing" on such KYC non-compliant accounts in a phased manner. Meanwhile, the account holders can revive accounts by submitting the KYC documents as per instructions in force. While imposing "partial freezing", branches are advised to ensure that the option of "partial freezing" is exercised after giving due notice of three months initially to the customers to comply with KYC requirements and followed by a reminder for further period of three months. Thereafter, branches to impose "partial freezing" by allowing all credits and disallowing all debits, with the freedom to close the accounts.

If the accounts are still KYC non-compliant after six months of imposing initial "partial freezing", branches should disallow all debits and credits from/to the accounts, rendering them inoperative. Further, it would always be open to the branches to close the account of such customers after issuing due notice to the customer explaining the reasons for taking such a decision. Such decisions, however, need to be taken by the Branch Manager.

In the Circumstances when the Bank believes that it would no longer be satisfied about the true identity of the account holder, the Bank shall file a Suspicious Transaction Report (STR)

with Financial Intelligence Unit India (FIU-IND) under the Department of Revenue, Ministry of Finance, and Government of India.

**G. Sale of third-party products**

When Bank sells third party products as an agent, the responsibility for ensuring compliance with KYC / AML / CFT regulations lies with the third party. However, to mitigate reputational risk to Bank and to enable a holistic view of a customer's transactions, branches are advised as follows:

- i. While selling third party products as agents, branches should verify the identity and address of the walk-in customer.
- ii. Branches should also maintain transaction details with regard to sale of third-party products and related records for a period and in the manner prescribed **in Point No. 8. (Maintenance of KYC documents and preservation period)**.
- iii. Bank's AML software will capture, generate and analyze alerts for the purpose of filing CTR/STR in respect of transactions relating to third party products with customers including walk-in customers.

## 5.4 Monitoring of Transactions

Ongoing monitoring is an essential element of effective KYC / AML procedures. Branches should exercise ongoing due diligence with respect to every customer and closely examine the transactions to ensure that they are consistent with the customer's profile and source of funds as per extant instructions. The ongoing due diligence may be based on the following principles:

- a. The extent of monitoring will depend on the risk category of the account. High risk accounts have to be subjected to more intensify monitoring.
- b. Branches should pay particular attention to the following types of transactions:

## **6 Correspondent Banking and Shell Bank**

Correspondent Banking is the provision of banking services by one bank (the "correspondent bank") to another bank (the "respondent bank"). These services may include cash / funds management, international wire transfers, drawing arrangements for demand drafts and mail transfers, payable-through-accounts, cheques clearing etc. Bank shall take the following precautions while entering into a correspondent banking relationship:

- i. Bank shall gather sufficient information to fully understand the nature of the business of the bank including information on management, major business activities, level of AML/CFT compliance, purpose of opening the account, identity of any third party entities that will use the correspondent banking services, and regulatory / supervisory framework in the bank's home country.
- ii. Such relationships may be established only with the approval of the Board or by a committee headed by the MD & CEO with clearly laid down parameters for approving such relationships, as approved by the Board. Proposals approved by the Committee should be put up to the Board at its next meeting for post facto approval.
- iii. The responsibilities of each bank with whom correspondent banking relationship is established shall be clearly documented.

- v. Bank shall also ensure that the respondent bank is able to provide the relevant customer identification data immediately on request.
- vi. Bank shall be cautious while continuing relationships with correspondent banks located in jurisdictions which have strategic deficiencies or have not made sufficient progress in implementation of Financial Action Task Force (FATF) Recommendations.

## **7 Wire Transfers**

Banks use wire transfers as an expeditious method for transferring funds between bank accounts. Wire transfers include transactions occurring within the national boundaries of a country or from one country to another. As wire transfers do not involve actual movement of currency, they are considered as a rapid and secure method for transferring value from one location to another.

**A.** The salient features of a wire transfer transaction are as under:

- i. Wire transfer is a transaction carried out on behalf of an originator person (both natural and legal) through a bank by electronic means with a view to making an amount of money available to a beneficiary person at a bank. The originator and the beneficiary may be the same person.
- ii. Cross-border transfer means any wire transfer where the originator and the beneficiary bank or financial institutions are located in different countries. It may include any chain of wire transfers that has at least one cross-border element.
- iii. Domestic wire transfer means any wire transfer where the originator and receiver are located in the same country. It may also include a chain of wire transfers that takes place entirely within the borders of a single country even though the system used to effect the wire transfer may be located in another country.
- iv. The originator is the account holder, or where there is no account, the person (natural or legal) that places the order with the bank to perform the wire transfer.

**B.** Wire transfer is an instantaneous and most preferred route for transfer of funds across the globe and hence, there is a need for preventing terrorists and other criminals from having unfettered access to wire transfers for moving their funds and for detecting any misuse when it occurs. This can be achieved if basic information on the originator of wire transfers is immediately available to appropriate law enforcement and / or prosecutorial authorities in order to assist them in detecting, investigating, prosecuting terrorists or other criminals and tracing their assets. The information can be used by Financial Intelligence Unit - India (FIU-IND) for analysing suspicious or unusual activity and disseminating it as necessary.

The originator information can also be put to use by the beneficiary bank to facilitate identification and reporting of suspicious transactions to FIU-IND. Owing to the potential terrorist financing threat posed by small wire transfers, the objective is to be in a position to trace all wire transfers with minimum threshold limits. Accordingly, Bank shall ensure that all wire transfers are accompanied by the following information.

### **C. Exemptions**

Inter-bank transfers and settlements where both the originator and beneficiary are banks or financial institutions would be exempted from the above requirements.

### **D. Role of Ordering, Intermediary and Beneficiary Banks**

#### **ii. Intermediary Bank**

For both cross-border and domestic wire transfers, Bank processing an intermediary element of a chain of wire transfers shall ensure that all originator information accompanying a wire transfer is retained with the transfer. #### **iii. Beneficiary Bank**

A Beneficiary Bank should have effective risk-based procedures in place to identify wire transfers lacking complete originator information. The lack of complete originator information may be considered as a factor in assessing whether a wire transfer or related transactions are suspicious and whether they should be reported to the Financial Intelligence Unit-India. As Beneficiary Bank, the Bank shall also take up the matter with the Ordering Bank if a transaction is not accompanied by detailed information of the fund remitter. If the ordering bank fails to furnish information on the remitter, the Bank shall consider restricting or even terminating its business relationship with the Ordering Bank.

absence of an account, a unique reference number, as prevalent in the country concerned, must be included.

- iii. Where several individual transfers from a single originator are bundled in a batch file for transmission to beneficiaries in another country, they may be exempted from including full originator information, provided they include the originator's account number or unique reference number as at ii above.

## **7.2 Domestic wire transfers**

- i. Information accompanying all domestic wire transfers of Rs. 50000/- (Rupees Fifty Thousand) and above must include complete originator information i.e. name, address and account number etc., unless full originator information can be made available to the beneficiary bank by other means.
- ii. If the Bank has reason to believe that a customer is intentionally structuring wire transfers to below Rs. 50000/- (Rupees Fifty Thousand) to several beneficiaries in order to avoid reporting or monitoring, the Bank shall insist on complete customer identification before effecting the transfer. In case of non-cooperation from the customer, efforts shall be made to establish his identity and Suspicious Transaction Report (STR) shall be made to FIU-IND.
